Prepared Under Contract to
United States Department of Energy
Bartlesville Energy Technology Center
CE-AC19-80BC10126

Published by
Office of Scientific and Technical Information
United States Department of Energy
1985

ACKNOWLEDGMENTS

The authors wish to thank a number of individuals whose help was invaluable in the research and writing of this book. Many current and retired Bartlesville Center employees gave freely of their time for both formal, taped interviews and informal discussions. Their names and the dates of their interviews are cited in the chapter footnotes. In addition, special recognition should be given to Harry R. Johnson and Robert L. Folstein, who provided not only information, but advice and assistance along the way.

Special thanks are also due to John S. Ball, who brought not only his knowledge as former Research Director of the Center to the project, but also his vast knowledge of the oil business and his critical eye for points of style. Both authors enjoyed several lengthy discussions with him and found his ideas, comments, leads, and insights extremely helpful. Kenneth J. Hughes at the Center also provided both formal and informal help in tracking down financial and personnel details.

The work was performed under a Department of Energy contract through C&W Associates/Historical Consultants. As a result, several additional sources of assistance came through the contractual relationship. Elizabeth Mohr at the Center served as Technical Project Officer on the contract, and was very helpful. The contract received further oversight from Jack Holl of the Department of Energy's History Division, and his suggestions and comments on the evolving drafts of the chapters were much appreciated. Philip L. Cantelon, senior partner in C&W Associates, provided close editorial readings of each chapter with a good eye for detail. Ruth Harris, senior historian with C&W, assisted in the research. Felicity Skidmore did a magnificent job of copy editing on short notice.

Thanks are also owed to Richard G. Hewlett, former Chief Historian of the Department of Energy, for his encouragement and practical suggestions.

A variety of others, both in and outside of the Department of Energy and the Bartlesville Center, helped in one way or another. Roger M. Anders and Alice L. Buck of the DOE History Division helped in tracking down elusive pieces of data. Joseph A. Pratt of Texas A&M University assisted in the early research stages. Gail Mathews and DyAnn Smith handled the word processing; Ms. Mathews did excellent work in untangling and incorporating the various changes and keeping straight the multiple drafts.

Carlisle also wishes to particularly thank the Hoover Presidential Library Association for a grant which made possible a stay in West Branch, Iowa, for work in the Hoover papers.

Errors which slipped past all these able people are, of course, the responsibility of the authors.

We also wish to thank our wives, Ann Carlisle and Barbara Giebelhaus, for their forbearance with our Oklahoma and Washington trips and our immersion in petroleum history over a three-year period.

DISCLAIMER
