Natural Gas Supply/Demand Notice of Inquiry

Sender Name: William K. Wright

Company/Organization:

I was disappointed when natural gas was deregulated and burned in bulk for electric power generation. Natural gas is such a clean burning and portable fuel, I feel it should be conserved for use in home and business heating, and transportation. Coal which requires handling, processing and exhaust clean up is much better suited for central plant applications, such as power generation.

Please discourage future use of natural gas for electric power generation and protect long-term natural gas supplies for heating and transportation.

Sincerely,
William Kevin Wright, PE
Sacramento, California
