Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Marie-Therese Frank

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Terry Pauls

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

Take a lesson from the history of fracking damage to the surrounding communities and acknowledge the dangers. I'm sure there are lots more instances than the few that have been publicized that I am aware of.

Please do the right thing by the people of this country. We pay your salary with our tax dollars while dirty energy gets a tax break. Keep us safe and do what is best for our beautiful environment which in turn is best for humans.

Sincerely,
Margaret Tamerlani

Subject: Environmental Review of LNG Export Applications; WORK TO BE DONE; SOCIAL JUSTICE IN GREAT DANGER!

Dear Ernest Moniz,

DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

WORK TO BE DONE; SOCIAL JUSTICE IN GREAT DANGER!

PROMOTE FAIRNESS, FREEDOM, JUSTICE, PEACE, HUMANITY, PRODUCTIVITY, WELL-BEING OF GENERAL PUBLIC. RESOLVE SOCIO- POLITICAL ISSUES, BALANCING BUDGET. OPPOSE SO CALLED "FAIR ELECTION ACT" PUBLIC FINANCE MATCHING SMALL DONORS FUND- DO MORE HARM THAN GOOD, RESOURCES BENEFIT "BAD GUYS" AS USUAL. TASKS: TOP PRIORITIES: Society in vicious cycles as in need of revolution, we MUST act:

(1). Prosecute, eliminate "MURDER- fraud- crime- injustice networks"= cruel tyranny= robbery machine = ROBBER- ISM; destroying essences of democracy, capitalism; continuing, on-going; relaying, penetrating every segment of our lives (inc. civic non- profit organizations); expanding here domestically to overseas- foreign countries; with threat, coercion, victimization, deprivation, discrimination; unjust practices, manipulation, influence; bad legislative bills; unjust hidden agenda with false/ misleading excuses (inc. private- public partnership, economic development, housing, school construction, transportation, abandonment of properties, maintenance of "paper roads", nonsense grants, programs; ..., whatever) to benefit/ facilitate "MURDER-fraud- crime- injustice networks" (inc. officials, judges, developers, lawyers, employees, etc.); expand further unjust operation; endless unlawful- immoral acts; rob/destroy resources (rights, land, properties, home, buildings, assets, accounts, income, pension, documents, evidences; public, private; business, civic, political); frivolous litigation, levies, foreclosures, garnishment, guardianship, power of attorney; improper processing of complaints, procedures, proceedings, docketing, bookkeeping, accounting; cause

vicious cycles: socio- political- election-media- budget- legislati
system problems; civil-human rights backwards; people-slave. E
of problems are provided below: **

(2). Restore: principle, fairness, cost-effectiveness, accountabilit
reliability, capability; fair election, justice, peace (including
civic, non-profit organizations), "check and balance"; Restore: TRUE
essence of democracy, fair election process; easy access to government,
files, records, transcripts; not unjustly manipulated, influenced,
misled by wrong person, information, or "official misconduct-
government gang- fraud- crime- injustice networks" = serious causes of
socio- political election media- budget- legislative problems, which
destroy people, families, society, peace, justice, democracy. Based on
merits, justification; NO double standards, improper processing of
complaints, procedures, proceedings; falsification, false records,
tampering of evidence, data; harassment, intimidation (complainant,
witnesses); false charges, citation, bond, imprisonment; disparities
and improper treatments, etc.; abuse of laws, power, authorities.
(3). Promote democracy, fair election, quality, competition, people
input (policies, issues, officials, judges); televise public hearings,
citizen/candidate forum/debate; maintain, disseminate meaningful
accurate information, records, capability, reasoning, good sense of
justice, public interest, endurance. Objective screening by meaningful
rigorous examinations, evaluations for quality, capability, endurance
and public interest.

* To capture extended serious problems of "MURDER-fraud- crime-
injustice networks" with official misconduct- government gang, please
incorporate the following: (A). complaints/ cases: administrative and
judicial levels; (B) frequent testimonies before government bodies,
official, legislators, law enforcement, committees, public hearings;
local federal; (C) spin-off complaints, improper processing of
complaints, procedures, proceedings, accounting, bookkeeping,
docketing, etc.; (D) Candidate statements, see Webs and archives. Urge
to re-open and investigate Congress.org, DNet (by League of Women
Voters), links, etc.; (E) complaints and reports to police, law
enforcement, consumer affairs, other authorities/agencies against
"fraud- crime- injustice networks"; (F). Numerous TV programs on social
issues (Dr. Lih Young: producer, host, speaker).

(G). Frequent recommendations/petitions to officials, agencies, law
enforcement, local - federal; as individuals or with civic
organizations. ** EXAMPLES OF PROBLEMS - "MURDER- FRAUD- CRIME-
INJUSTICE NETWORKS"- with official misconduct, government gang- endless
unlawful immoral acts:

(A): OPM, IRS, DHHS, SSA, DOJ, FBI, DOD, USDA, DOC, USCIS (US
citizens/ neutralization services), custom services, various agencies,
law enforcement; 3 branches, local federal- global; National Park
Service (Prettyman?), Library of Congress (Neil Gladd); many
financial/brokerage/ accounting/ bill-payment processing/ collection
institutions/agencies; insurance, car related businesses, utilities...,
more; dealers Lakeforest Oldsmobile; phone/utilities/cable, judges,
legal/court personnel, detective/ process server/ impersonators, with
phony names, or would not provide names even in the court cases
(Complainant could not get access to court files; could not even make
copies); Leslie Gradet, Tamera Jones, William D Roessler; Offices of
Treasury, Comptroller, Attorney Gneral: Joel Jacob/Jacobson, Gail
Malle-Davis, Sylvia J. Brokos, Mary Hawse, Linda Tanton, Gerald

Langbaum, John Barry, Pamela Porter, Leo F. Partridge, Mark V Jamis Riley, James Britt, Audrey Thomas, Jeanne Lippy, Jesse Rosenburger, Ralph Lepson; transcribers Margaret Bauer, Senat Walter Baker, Barbara Hoffman, Thomas Middleton, Trooper: M Vincent Mass, State Election Board Ross Goldstein; Maryland D Page, Barbara Smith(?), SSA employees and supervisors (especially in Rockville, Md), and Bullivant (?), probably in N. J.; or other states). Lobbyists/ municipal attorneys/lawyers/affiliates, Paul Glasgow, David Venable, Joseph Stoltz, Jr., Barry Gordon, Stephen Perouka, David Steinberg, Wolpoff & Abramson, Richard D. Mirsky, Poppleton, Garrett & Polott, P.C., accountant Hilda K. Matijevic; Marc Sliffman (Silver Spring, Wheaton area), Samuel White and his law firm and lawyers Shawn Bartley, Daniel Pesachowitz, Laura Jolly (phony person, named as "substitute trustee", but can never be found or contacted even through official agencies); many court personnel and judges (District Court Court of Special Appeals). Court Auditor Robert Romero. State, county health services organizations/ agencies, Department of Health and Human Services, Montgomery County Crisis Center, Jean Burgess (white, female), Marsha Aaron; Department of Aging; Adult Protective Services, Sherry Davis, Suzanne Lord (?), Odick Esq., Bonnie Klem, etc.; Suburban Hospital, physicians, emergency staff; social worker Jody Crecensi (?), case manager Patricia Grafferty (?), Robert Rothstein, M. D. (?), Tipp Woodward; Manor- Care in Potomac Maryland: Cheryl Paulson (? , administrator) and nurses, etc.; forensic services, Maryland Department of Health and Mental Hygiene: Jolie Smith; numerous psychologists, psychiatrists, social workers, etc.: Potomac Ridge Steven Israel, Collin, Gabriel (?); social worker Tracy Lewit; Springfield Hospital Center: forensic services, Kevin Knight, Dr. Valadez (refused to give full name, despite repeated requests); Carla Craville, Francoise Reynolds, Roxanne Heyman, Amy True; Judges James Sasfield, Gary Crawford, Cheryl McCally, etc., prosecutors/government attorneys, e.g., John McCarthy, Nunylny (?), Peter Mitchell (Montgomery County Office of Human Rights); District Court Commission (Rockville, Md) M. Dickerson; Court Personnel T.M. (only initials, no full name available); many judges, clerk of the courts (Jeffrey Ward, Loretta Knight, Bettie Skelton, Molly Rhul, etc.), other court personnel, various counties, states; local federal; law enforcement, FBI; police e.g., in Rockville, Md. Sgt. Cowell (first name not available), C.P. Sadleson; officer Davis (MCPD); Denis Lewis (Baltimore County); sheriff: R. Lewis (Female, White, Montgomery Countym Md.), K. Naff (white, male, Montgomery County, Md); fire and rescues (abuse, even no fire; conspiracy).

(B): The problems are interrelated horizontally and vertically, among all issues, local- global. Clerks of the Circuit Court (Montgomery County, Md.) Loretta Knight, Bettie Skelton, Molly Rhul; District Court Clerk Jeffrey Ward, Administrative Judge Cornelius Vaughey, Sheriff Elliot Tolbert, etc. government attorney John McCarthy, Kristen Bender, court personnel, attorneys (public, private), law enforcement (FBI, sheriff, police, fire/rescue, etc., contractors) are part of the "fraud- crime- networks: with spying, surveillance, harassment, unlawful search, stealing, robbery, injuries; false arrest, imprisonment, citation, trespass, testimony; withholding witnesses; destroy information, documents, evidence, etc.

(C). False/ unjust/ frivolous levies, liens, garnishment, guardianship, power of attorneys, foreclosure, tenant-hold-over-

eviction, etc. Thousands of cases are pending in the court system years or even decades; believed to be filed by "fraud- crime- net to victimize people; without due process, proper services, proceed cause homelessness, poverty; not because of the problems of homeowners/citizens, but because of unjust judicial/court/legal personnel, court auditor Robert Romero as part of "official misconduct- government gang- fraud- crime- injustice networks". Judges (unjust, irresponsible, judicially disabled) include Warren Donohue, John Debelius, Durk Thumpson, Ann Harrington, Louise Scrivener, Lawrence De Beard, Eric Johnson, James McKenna; District Judge Gary Everngam, Judge Gary Crawford; court personnel/ sheriff, attorneys, affiliated law firms; Sheriffs Earnest Turner, R. Lewis, K. Naff, etc.

(E). Problems of privatization, irresponsibility, disabilities of government attorneys and judicial/legal/court personnel are very serious, expanding, local- nationwide- global; exporting injustice overseas; Rockville city, Montgomery County, Maryland state; New Jersey Monmouth County, Judge Robert McLeod (private attorney), Judge Patricia Bueno Cleary, Prosecutor (private attorney) Patrick Healy, police David D'Arcy.

(F) Other people committed, conspired with police and fraud- crime- networks: Private attorneys: Robert McCarthy (Bethesda, Md.), Olivia Cammack (Silver Spring, Md.), David Slacker (Bethesda Md.); Ria Rochvarg (assigned as legal assistance provider to certain counties by Md. Department of Health and Mental Highgiene, but she went around the state for various abuses with Sherry Davis, Police Davis, etc. attorneys (public and private), Timonthy Adelman, Esq., (?) and law firms Adelman, Sheff and Smith(? in Annapolis, Md), Robert McCarthy, Suburban Hospital, etc. Landlord/ landladies e.g., Jiewen Tan (Rockville, Md.) and Chia Yao (Gaithersburg, Md.) had been unjustly influenced/ conspired.

(G). MURDER-FRAUD- CRIME- INJUSTICE NETWORKS inc. Montgomery County Council, Md, Nancy Floreen, Roger Berliner, Valerie Ervin; Sonya E. Healy, Esq. Legal counsel/Chief of staff (any relation to Patrick Healy, esq. in New Jersey??), Jackie Steward, council hearing coordinators/substitute; Md General Assembly, Jamie Raskin; U. S. Congress, Senate, legal staff; American U, administrative staff, security guard, students (4801 Massachusetts Ave., NW, DC); Catholic U; US Institute of Peace, conference organizers/ speakers.

Sincerely,
L Young

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Carl Gutman

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Sybil Paukert

Fracking is extremely dangerous and harmful to the environment. It pollutes the water, the soil, the air and creates traffic and pollution in rural areas. It is also responsible for causing earthquakes. I believe that all fracking should be banned immediately. I am so sick of our government selling out to the fossil fuel corporations and allowing them to bully citizens and drill on the land even if they don't want it. Natural gas is touted as "clean energy" but to get it is so dirty and dangerous. Fracking must be stopped for good.

Jul 13, 2014

Ernest Moniz

Subject: Review of LNG Export Applications

Dear Ernest Moniz,

Although I understand the Department of Energy's proposal to end the conditional approval of Liquefied Natural Gas (LNG) export applications, much more is needed to deal with this problem that the Obama administration is promoting.

DOE's own analysis makes it clear that exports will cause additional fracking, a dangerous method of gas extraction which is not being adequately regulated at either state or federal levels. Furthermore, the Environmental Protection Agency has grossly underestimated the amount and potency of methane leaks which contribute to climate change.

The current push to rapidly approve the export of as much natural gas as possible is nothing more than a ploy by large gas companies to profit from the rapid sale of U.S. reserves overseas at the expense of communities who will be harmed by fracking, while jacking up the price of gas for U.S. consumers. It is shameful that the Obama administration and DOE are promoting this exploitation of people, the environment, and international politics at the behest of the fossil fuel lobby.

Rather than depleting our own domestic reserves, we should be conserving them and investing in renewables.

Sincerely,
Shirley Schue

I live in the far northwest of Oklahoma, sadly, I see the mess, I smell it, killing the employees due to the dangerous road conditions. It appears oil, gas lines are not checked as they should be. The native animals have almost left the area. Perhaps the farm land would be better off if the farmers, ranchers, and all people within this area would choose NOT to be paid for the drilling mud to act "act as if" it were not harmful to the entire water ways, rivers, streams, creeks and family farm water.

Thanks to someone has a open ear

Sincerely,
Linda Clark

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
William Morgan

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Marnica Andrews

Ernest Moniz

Subject: Environmental Review of LNG Export Application

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Natalie Hinebaugh

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

We all are seeing the sad health impacts on those exposed to fracking's influence. We have seen the startling sudden damage now occurring to land and mountains damaged by these practices. We have seen the farms disappear when owners agreed to allow these practices, the water no longer safe, the ground poisoned.

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Jody Harper

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production. The analysis should also include the impact of fracking on finite potable water resources as well as the fracking-induced seismic activity across the nation where fracking operations are common.

In Virginia alone, the risk of dangerous, fracking-induced seismic activity is high. You may recall the 2011 5.8 earthquake in Mineral, Virginia, that damaged the Washington Monument. The quake also bounced around 1.15-ton nuclear spent fuel casks and shut down the reactors at the nearby North Anna Nuclear plant, which sits directly above a known earthquake fault in the Central Virginia Seismic Zone.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Diana Artemis

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Lynda Polich

Ernest Moniz

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Shawn Knudeson

Subject: Environmental Review of LNG Export Applications

Dear Ernest Moniz,

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Victoria Moore

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Jay Hotchkiss

While I applaud the Department of Energy's proposal to end the practice of conditionally approving liquefied natural gas (LNG) export applications, much more is needed to understand the impacts of allowing LNG exports and to protect communities from the dangers of increased fracking to meet foreign demand. DOE's own analysis makes it clear that exports will cause additional fracking, and the environmental impacts from increased fracking must be considered as part of your analysis.

When it comes to evaluating LNG export facilities, please update your analysis to reflect recent studies showing that the Environmental Protection Agency has underestimated the amount and potency methane leaked during gas production.

With a full understanding of the impacts of LNG exports -- from the fracking process in the U.S. to the potential displacement of clean energy in importing countries -- a more complete understanding of how LNG exports will have on our climate is critical.

Sincerely,
Kathleen Perkins
