

The Office of Senator Jon Tester
706 Hart Senate Office Building
Washington, DC 20510

June 22, 2014

Dear Senator Tester,

As Congress considers policies for balancing future development of our natural resources with preservation of our environment, it is important that you remember one thing; Our country cannot afford to jeopardize the well being of millions of Americans in the pursuit of political victories and ideological purity.

We must not forget is that we are all in this together.

Regardless of political affiliation or ideological preferences, very little can be accomplished if we do not work together towards achieving fair and effective public policies. Adversarial statements and political jabs only provoke the divisiveness that inherently exists in the lawmaking process and must be avoided if the people's work is to be done.

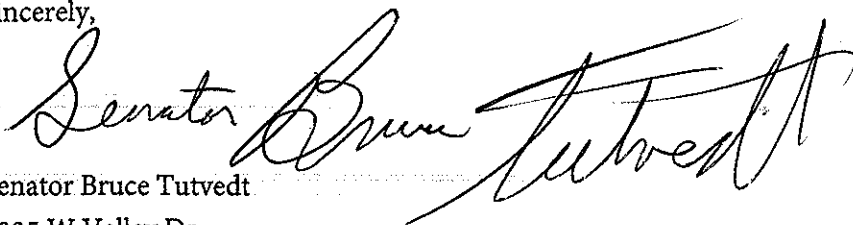

Unfortunately, ideologically driven special interest groups are sabotaging responsible policy proposals regarding the exportation of one of our nation's safest and most abundant fuel sources, Liquefied Natural Gas.

Restricting our nations energy producers from providing safe and affordable energy supplies to those who need it most is irresponsible to the health of our nation, and to the health of millions around the globe who are deprived of an adequate energy source.

By attacking businesses that provide one of the primary energy sources used in our national economy, we not only jeopardize the future of energy security in our country, but also discourage the hard working, risk taking attitude that led to our nation's greatest achievements.

Facilitating rather than restricting the efforts of individuals is a lot more conducive to success and will provide much needed stability to our national economy. Please protect the integrity of a hard day's work in America by supporting our nation's energy producers in their fight against the destructive policy proposals emanating from Washington. Only with your help can we succeed.

Sincerely,

A handwritten signature in black ink, appearing to read "Senator Bruce Tutvedt". The signature is written in a cursive, flowing style.

Senator Bruce Tutvedt
