

Petition: Say NO to the Climate Monster Calcasieu Pass 2 (CP2)

Dear President Biden and Secretary Granholm,

We write to urge the Department of Energy (DOE) to stop the CP2 project in Louisiana and all new LNG exports until it updates how it determines whether new licenses are truly in the public interest.

Sending U.S. energy resources to other countries drives up prices for American families and businesses at home and now is not the time to be driving up energy costs even more.

It is critical that DOE assess the climate, environmental justice, and consumer impacts when determining whether exports are in the public interest, especially as the agency considers its current pipeline of nearly 20 LNG export projects under review.

Analysis from the Sierra Club has found that lifecycle emissions of all existing and proposed LNG export terminals would be equivalent to 675 coal plants annually, putting domestic and global climate targets out of reach.

Increased LNG exports also have significant ramifications for environmental justice communities as the impacts of climate change fall most heavily on low-income communities and communities of color. These polluting projects are often proposed in communities that already bear the burden of heavy industry and are on the frontlines of the bigger hurricanes and storms caused by climate change. That is unacceptable.

With the agency's pending decision on the CP2 export application, in particular, the stakes could not be higher. Please do the right thing and stop approving these projects that hurt our climate, communities, and economy.

Thank you!
