CSLF Program Plan for Capacity Building

Barbara N. McKee
Director, CSLF Secretariat

Presented to CSLF Policy Group
12 October 2009

Carbon Sequestration Leadership Forum

www.cslforum.org

Mission

The Capacity Building Program will assist all CSLF Members to develop the information, tools, skills, expertise and institutions required to implement CCS demonstrations and then move rapidly into commercial operation.

Guiding Principles

- Use a country-led process in which each country defines its own needs.
- Share information and tools, create skills and expertise, and build institutions.
- Tailor capacity building to the individual needs of each Member.
- Take advantage of existing resources and avoid duplication.
- To the extent possible, work with partners and leverage resources.

Initiatives

1. Disseminate practical information
2. Build capacity in emerging economies
3. Assist government and regulatory agencies
4. Build academic and research institutions for CCS

Implementation

1. Needs assessment
2. CCS activity analysis
3. Implementation plan
 - a. Pilot implementation
 - b. Wider implementation
4. Resource development
