DRAFT
CARBON SEQUESTRATION LEADERSHIP FORUM
DATABASE TEMPLATE

Note by the Secretariat

Background

At its inaugural meeting on 25 June 2003, the Technical Group decided that the Secretariat would develop a database template for baseline information (including research activity, literature, country-specific technical data, and commercial activities). A database will be created from the baseline information submitted by each member country. The database template is the format for information to be obtained.

Action Requested

The Technical Group is requested to approve the Draft Carbon Sequestration Leadership Forum (CSLF) Database Template.

Conclusions

The Technical Group is invited to note in the Minutes of its meeting of 20 January 2004 that:

“The Technical Group approves as Final the Draft Carbon Sequestration Leadership Forum (CSLF) Database Template.”

DRAFT
DATABASE TEMPLATE

Project Title	Short Description	Scale of Project (Research, Demonstration, or Commercial)	Partner Organizations	Costs, Storage Capacity, or Technology Gaps	Links to Reports	Start Date
