

Strategic Plan Implementation Reporting System

Note by the Secretariat

Background

This is the initial reporting under the new Strategic Plan Implementation Reporting System (SPIR).

Reports were received from the following CSLF activities:

- Capacity Building in Emerging Economies

- Legal Issues

- Projects Interaction and Review Teams (PIRT) Activities

- Identify Gaps in CO₂ Capture and Transport

- Review and Identify Standards for Geologic CO₂ Storage Capacity Measurement

- Stakeholders

- Secretariat

50 stakeholders have signed up for the CSLF registry since the April CSLF meeting. Currently there are 66 registered stakeholders.

A CSLF Discussion Forum, (BLOG) was approved by the Policy Group for a 6-month trial. Its purpose is to facilitate greater involvement of the stakeholders and to foster greater communications both among stakeholders, and between stakeholders and the CSLF. The development is nearing completion.

Discussion has been initiated between the CSLF Secretariat and the European Commission to develop draft procedures for election of the Technical and Policy Group Chairs and Vice Chairs.
