## PLANNING FOR THE 2011 MINISTERIAL MEETING

*Note by the Secretariat*

### Background

Article 3.2(b) of the CSLF Terms of Reference and Procedures states that:

Ministerial meetings will normally be held approximately every other year. Ministerial meetings will review the overall progress of CSLF collaboration, findings, and accomplishments on major carbon capture and storage issues and provide overall direction on priorities for future work.

The Peoples Republic of China has graciously agreed to host the next CSLF Ministerial in Beijing in 2011. The exact dates and venue have not yet been selected. Ministerial meetings are complex events and it is necessary to start planning for the Ministerial soon.

### Action Requested

The Policy and Technical Groups are requested to discuss the major themes that should be discussed at the Ministerial and create a Steering Committee for the Ministerial.
