CSLF Task Force for Action Plan 6
Monitoring Geological Storage and
~~Monitoring~~ for Commercial Projects

Technical Group Meeting

Bergen, Norway

12 June 2012

Carbon Sequestration Leadership Forum

www.cslforum.org

- Changes in scope
 - New title
 - Objective and scope: Change “regular” to “initial” and “new and updated” to “present”
 - Limit duration with decision gate at 2013 report
 - Update schedule to fit CSLF meeting schedule
 - More proactive scope – not only review but identify weaknesses and interact/communicate with ISO WG on CCS
- Actions
 - Norway (NPC) to check if CSLF can get an associate status with ISO
 - TF Lead (LIE to) issue first draft by late August-early Sept., based on CO2CRC report
 - Separate column for country in list of members
- Unresolved:
 - Communication with and engagement of stakeholders

Objective

The Task Force of the Storage and Monitoring for Commercial Projects, TF 6, shall perform ~~regular~~ **initial** identification and review of new and updated standards for storage and monitoring of injected CO₂.

The application of such standards should inform CO₂ crediting mechanisms.

Proposed Scope

- Identify and review ~~new and updated~~ **existing** standards for geological CO₂ storage and monitoring on an annual basis
- Identify and review ~~new and updated~~ **existing** guidelines for communication with and engagement of involved communities and regulators on an annual basis.
- **Identify shortcomings and/or weaknesses in standards/guidelines**
- ~~Keep track of the work within~~ **Communicate findings to the** ISO, ~~where a CCS~~ working group **that** has been established
- Produce annual summaries of new as well as updated standards, guidelines and best practice documents regarding geological storage of CO₂ and monitoring of CO₂ sites.
- Follow the work of other task forces related to CO₂ storage, e.g.
 - Task Force on Action Plan#7 – Technical Challenges for Conversion of CO₂-EOR to CCS (Canada).
 - Task Force on Action Plan#1 – Technology Gap Closure (Australia)
