PIRT Meeting

03 October 2016

Tokyo, Japan

Engaging CSLF-recognized Projects

Richard Lynch

CSLF Secretariat

www.cslforum.org

Secretariat Report to PIRT

Outcomes from London Meeting

- CSLF Secretariat and Dr. Greenberg (representing the CSLF-recognized Illinois Basin – Decatur Project) should jointly develop a useful format (neither superficial nor onerous) for CSLF-recognized projects to report their status.

Secretariat Report to PIRT

Outcomes from London Meeting

- PIRT delegates from Australia, Canada, and the United States should use the new project reporting format to engage projects located in their countries (approx. 4-8 projects in total) and prepare short status summaries in time for the 2016 CSLF Annual Meeting.

Engaging CSLF-recognized Projects

Reporting Format finalized in July

Carbon Sequestration leadership Forum

www.cslforum.org

Project Name:

Brief non-technical description:

Is the project still active?

- If not, when did it end, and why?
- If still active, what have been the important factors in its continued progress, and why?

Please briefly describe the overall project timeline (with emphasis on next six months):

What kinds of sharable information have been produced?

Please describe any interesting outcomes or gains in knowledge.

Who is the project's main point-of-contact for the CSLF?

Engaging CSLF-recognized Projects

Reports Received from 10 Projects

Australia

- **CarbonNet Project**
- **Gorgon CO_2 Injection Project**
- **The South West Hub Project**

Reports Received from 10 Projects

Canada

- **Alberta Carbon Trunk Line**
- **The Boundary Dam Integrated CCS Project**
- **CANMET Energy Technology Centre (CETC) R&D Oxyfuel Combustion for CO_2 Capture**
- **Quest Project**

Engaging CSLF-recognized Projects

Reports Received from 10 Projects

United States

- **Illinois Basin – Decatur Project**
- **Illinois Industrial CCS Project**
- **Michigan Basin Development Phase Project**

Overall Quality of Information

- Length of updates varied from 1 to 3 pages
- Resulting detail of information provided also varied
- Every update provided useful information
- There were even a few revelations:
  - CANMET Project has ended!
  - Two projects have changed their names!

Engaging CSLF-recognized Projects

Immediate Conclusions

- Overall format seems good – meets the objective of being neither too superficial in information requested nor too onerous for project sponsors to complete
- CSLF delegates are the right people to engage project sponsors in their countries
- This is only first step – what do we do with this information now that we have it?
