Possible New Technical Group Activities

PIRT Meeting October 3rd, 2016, Åse Slagtern

Possible New Technical Group Activities

- Mission Innovation
 - Missions within CCS
 - How could CSLF contribute?
 - Ensure no new coordinating activity within CCS
 - Possible areas for collaboration

Possible New Task forces

1. **Improved pore space utilization**
2. **Bioenergy with carbon capture and storage (CCS)**
3. **Geo-steering and pressure management techniques and applications**
4. **Offshore EOR**
5. **Advanced Manufacturing Techniques for CCS Technologies**
6. **Dilute stream/Direct Air Capture of CO₂**
7. **Global Residual Oil Zone (ROZ) Analysis and Potential for combined CO₂ Storage and EOR**
8. **Study/Report on Environmental Analysis projects throughout the world**
9. **Update on non-EOR Utilization Options**
10. **Ship transport**
11. **Definitions, TRL, scales and other**
12. **Industrial CCS**
13. **Global Scaling of CCS**
14. **Compact CCS**
15. **Capturing CO₂ from mobile application**

Further Actions Possible New Task Forces

- New task force
 - **Industrial CCS – France may chair**
- Redefining content of
 - **Geo-steering and pressure management techniques and applications**
