Subject: RE: Petrocom's Application

I need capability to move 100,000 MMBtu per day through each point. My thinking is $100,000 * 365 \text{ days} * 2 \text{ years} = 73,000,000 \text{ MMBtu}$ for the 2 year period for each point.

I'm assuming 1Bcf = 1,000,000 MMBtu therefore I think we need to set up for 73 Bcf.

The main thing is that we can move up to 100,000 MMBtu through on a daily basis.

Thank you and please let me know if I can answer any other questions.

Subject: Petrocom's Application

Mr. Stevens,

I need a clarification. Your previous Order was for 7.3 Bcf import and 7.3 Bcf export from and to Canada, and 7.3 Bcf import and 7.3 export from and to Mexico. Your current request is for 73 Bcf separate volumes as previously stated. As soon as you respond the new authority can be signed.

Thank you,

Allyson C. Reilly
