**Subject:** FE Docket 11-161-LNG

I strongly dispute Freeport LNG's "significant environmental benefit" statement because of the proposed location of this facility within four residential communities and on designated wetlands. There will be only negative effects environmentally to area homeowners and to the Brazoria National Wildlife Refuge which both will be forever and detrimentally impacted by both the construction and the operation of this facility. I also disagree with their sham of a statement that the project "supports American energy security". Selling our precious natural resources to other countries only diminishes both our energy supplies and our national security. I have found numerous fallacies, conflicting statements, and discrepancies in various Freeport LNG documents which all point to a company policy of deception in its attempt to achieve its goals without consideration for the environment, neighboring homes and families, our nation or its security.

Please deny any permits to this company who intends to destroy both the value and environment of my neighborhood and community.

Sincerely,  
Kathy Davis
