Subject: FE docket 11-161-LNG
Date: Tuesday, March 13, 2012 10:23:11 AM

This application needs to be denied due to the poor choice to locate this facility next to several neighboring residential subdivisions. The location chosen by LNG is inconsistent with the public interest and endangers the lives and standard of living of those nearby residents. It is also inconsistent with the proximity to the Brazoria National Wildlife Refuge for the normal and expected use of the refuge and could endanger many species of wildlife in the vicinity. This location was ill conceived and the permit should be denied until a new, more appropriate location is found.

**Sincerely,
David Collins**
