FE Docket No. 12-32-LNG

DOE:

I request that the DOE/FE deny Jordan Cove's amendment of application for increase in volume of natural gas to export from Coos Bay, Oregon. The increase makes no sense. The Coos Bay inlet and port area is a small one and an increase in volume of output and export of the natural gas would put a strain on the waterways. Also, this increase would add more pollution into the atmosphere from the plant, which affects the entire population of Coos Bay and North Bend, as they are in close proximity to the proposed plant and dock.

Please deny Jordan Cove's request to increase the amount of natural gas exported from Coos Bay, Oregon.

Sincerely,

Kathy Dodds  
North Bend, Oregon
