Re: FE Docket No. 12-32-LNG

Dear Mr. Talbert & Ms. Moore:

I am writing in support of the application by Jordan Cove Energy Project, L.P. for long-term authorization to export liquefied natural gas produced from domestic and Canadian resources to non-Free Trade Agreement countries. The Jordan Cove project represents an unprecedented economic opportunity for Coos County and the region. I am writing for a great number of friends and relatives who live in this area and wish to have me send this to you. Some of the letter is repeated in other similar letters to you, some of it is my own words.

At \$6 Billion, the Jordan Cove project and the associated Pacific Connector Pipeline would be, by dollar value, the largest private sector investments in Oregon. Coos County continues to experience chronic financial distress from reduced timber harvests that have led to greatly reduced revenues, and as a result, public services. This has required Coos and other Southern Oregon counties to make difficult and painful cuts in public services. Even before the current recession, Southern Oregon counties lagged the rest of the State of Oregon and the nation in economic growth and routinely posted unemployment figures higher than the state and national averages.

The Jordan Cove project provides several key opportunities for the region:

1. **Construction Jobs.** Terminal construction is forecast to create more than 2,600 jobs at peak with an average of more than 900 jobs over three-and-a-half years of construction. The pipeline will employ an additional 800 workers over two years of construction.
2. **Permanent Jobs.** The terminal and pipeline will create 150 permanent jobs with an average annual salary of \$75,000, which is twice the average per capita income in Southern Oregon. Perhaps my grown children will return to this area for family wage jobs!
3. **Local Taxes.** Jordan Cove will pay \$25-30 million per year in local taxes. Considering the multi-decade projected operations of the Jordan Cove facility, these tax payments would be a large and reliable revenue source for local governments. Pot-holes and sidewalks repaired and roads repaved! An area to be proud of!
4. **Economic Development.** Construction of the Jordan Cove terminal will revitalize the Port of Coos Bay, a naturally deep-water port that is under-utilized. Port facilities will be improved, making the Port of Coos Bay more attractive to importers and exporters. In

addition, the Pacific Connector Pipeline will provide connections to the existing natural gas pipeline infrastructure in Southern Oregon thereby increasing the supply of natural gas. The increased availability of natural gas in Southern Oregon would make the region more competitive in attracting industries that require reliable, large volumes of natural gas. This improvement in natural gas availability will also come at no cost to utility ratepayers because the pipeline will be financed by Pacific Connector's investors, with no ratepayer recovery.

For these reasons, we ask that you approve Jordan Cove Energy Partners, L.P.'s application to export LNG to non-Free Trade Agreement countries.

Can we build it and stay within ecologically sound practices? Yes! The technology is there, the fire departments are willing to be trained in additional measures, and you can bet we all care about our environment to make sure measures are taken to have a minimal impact. **WE NEED JOBS HERE and WE BELIEVE WE CAN DO THIS AND STILL BE CAREFUL OF OUR BEAUTIFUL STATE!**

Sincerely,

Kathleen Hornstuen
