Hi Lisa,

Of course, we only are concerned about the disclosure of the commercial terms. In past applications all delivery points have been described, so I do not see any issue.

Jorge Ocampo

Hello Jorge.

May we include this email (NOT the attachment) in the public docket for this application?

Lisa Tracy

Hello Lisa,

My apologies. The reason why I did not provide you further info about this section was because it did not change almost anything.

The exported natural gas will be delivered by Seller at Keystone Permian Basin Pool on EPNG's system. When Keystone point is not available, the gas can be delivered at the Secondary Delivery Point (Keystone Waha Basin Pool). In both cases gas will be exported through the same point in the border.

U.S. Point of Entry/Exit: Clint, Texas
Corresponding Canadian/Mexican Point of Entry/Exit: Ciudad Juarez, Chihuahua
U.S. Transporter: Samalayuca Pipeline
Foreign Transporter: Pemex Pipeline

Attached you will find the physical deal confirmation entered into between NAGP and ECHI where you can find all main commercial terms.

If you need further information regarding this topic pleases do not hesitate to contact me.
