Subject: Support of LNG expanded development and exports

To Whom it may concern:

As a disabled US Army veteran of the Vietnam War, I am writing in support of the applications for LNG exports. I have reviewed the report by NERA that found natural gas exports would benefit many elements of our economy beyond the benefits for the natural gas industry. The economy in my community is sluggish at best and Florida's dependence on tourism indicates we need to expand our industrial and energy industries as opportunities exist both locally and nationally.

During the past 10 years I have provided public testimony in numerous state and federal hearings in support of US energy independence that may better be acquired with increased onshore and offshore energy exploration and production and the construction of pipelines allowing access to the resources of Canada. The expansion of the LNG industry, including exports, are good for consumers, investors, and the American workers through new and better jobs.

Please consider the benefits to our economy and citizens as you evaluate this application essential to the progress of our LNG industry.

Sincerely,

William K. Boe (SGT) Delta Co., 1st Bn., 14th Inf., 4th Inf Div.
