*Regarding the 2012 LNG Export Study*

*Dear Honorable Steven Chu,*

*Your department commissioned the NERA Economic Consulting study regarding the public interest in exporting LNG. NERA claims on their website that it is their “commitment to deliver unbiased findings, and our reputation for quality and independence” that makes them so valuable to their clients. Their report is evidence that their study was criminally flawed and wholly biased in favor of exporting LNG to the Asian gas markets.*

*If this is the basis for your pending decision regarding the economic public interest of exporting fracked gas, you have no factual basis upon which to issue your order, and such an order would be complete fraud. With the newest information cited by Senator Wyden and others, you have a good basis for putting out a request to commission a new study by a new, non-gas industry, public interest entity.*

*If you continue with your stated intent of determining economic public interest on the timeline you are on, this would be an act of treason and economic warfare upon the economy of the United States as well as the North American Continent.*

*Cease and desist.*

*Hit the reset button.*

*Start all over again.*

*Jonathan M. Hanson  
Economic and Environmental Stakeholder*
