Subject: NO EXPORT- NO TO FRACKING IN NY

It is infuriating to me that our gutless congress cannot deal responsibly with the deficit and will consider selling out our quality of life for a few \$\$\$\$. Even more insulting is the possibility that we may do so to EXPORT.

I am sitting on the Marcellus shale and I want you to BUY my property so that I can move out of this state if we are forced to endure fracking trucks, water haulers, and the constant knowledge each time I see one that we were sold out.
