**Subject:** 2012 LNG Export Study  
**Date:** Friday, February 22, 2013 10:41:40 AM

---

Dear Sir or Madame:

Please find below my "reply comments" in support of various "original, positive comments" previously submitted on this matter.

(1) LNG Exports are in the nation's "public interest," improving trade balance and energy security for the U.S. and its allies. It would also stabilize world energy markets and reduce reliance on countries such as Russia or OPEC.

(2) LNG exports will result in "net economic benefits" for the U.S., generating thousands of new jobs, and billions in investment and growth in GDP.

(3) The U.S. produces enough natural gas to meet both domestic and export needs; and increased U.S. natural gas supplies could deliver greater geopolitical stability and national security.
