Secretary Steven Chu  
2012 LNG Export Study  
U.S. Department of Energy (FE-34)  
Office of Natural Gas Regulatory Activities  
Office of Fossil Energy  
P.O. Box 44375  
Washington, DC 20026-4375

Dear Secretary Chu,

Despite the opposition from Representative Markey, I am writing to urge you to approve the exportation of liquefied natural gas. We have a daughter here in Arkansas and a son in Arizona; thankfully, both of them have jobs. However, with one grandson and two granddaughters, I'm very concerned about the future of our country. We need our economic situation to improve so future generations can succeed. The revenue and jobs this project will create is a step in the right direction.

My husband and I moved here from Missouri when we retired. My husband was a self-employed barber and I am a registered nurse. For the past six years, I have been working as a volunteer PRN at a charitable Christian medical clinic. I also work as a fill-in nurse at a special needs school. In my line of work, I see a lot of people in need. This area could certainly use more jobs because more and more people are out of work and are unable to afford adequate medical care.

With energy being a very important part of our economy, we need to keep moving forward with natural gas development. Currently, our country has no means to export liquefied natural gas. It is my hope that you will approve the applications to modify our facilities to allow for exportation of liquefied natural gas.

Best,

*Bettie J. Jones R.N.*
