---

To Whom It May Concern:

After reading the recent report by NERA, [as well as a letter written to U.S. Department of Energy Secretary Chu by U.S. Sen. Lisa Murkowski](#), I would like to express my support for LNG Exports. I wholeheartedly agree with the senator's call to move forward with processing applications and granting export licenses for LNG exports as they are in our nation's "public interest." Our sluggish economy is in dire need of support, and this is one way to facilitate growth. Furthermore, this project will improve trade balance and energy security not only for our great nation but for our allies as well.

However, as there is a limited amount of global demand for LNG, I urge the DOE to move judiciously and without delay with regard to next steps. It would be unfortunate if another country were to capitalize on this great endeavor.

Thank you for your time.

Sincerely,

Peter Silas
